

September 15, 2009

Andrew Nicosia

Dear Mr. Nicosia,

Enclosed please find copies of documents in response to your request under Wisconsin's Public Records Law. The request was made in your letter to the Wisconsin National Primate Research Center dated July 6, 2009.

Your request was for, "all laboratory reports, protocols, daily care logs, veterinary reports, photographs, videotapes, and any and all other records referring to cj0506 at the Wisconsin Primate Research Center." Responsive records totaling 15 pages are enclosed.

Please note that laboratory reports are withheld because they constitute raw research data (Wis. Stats. §19.36(5)). Furthermore, premature disclosure of this information interferes with the competitive position of the University (Wis. Stats. §19.85(1)(e)). Also, per the Balancing Test inherent in the Public Records Law we have made the specific determination that the public interest in maintaining academic freedom of researchers to determine how and when their research data is published and enabling patenting of researchers' inventions outweighs the public interest in accessing unpublished data.

There are no known photographs or videotape of cj0506. The protocols were destroyed before your request was received as part of ongoing purging of outdated, inactive files. It has been more than 9 years since cj0506 was at the University of Wisconsin - Madison.

The portion of your request asking for "any and all other records referring to cj0506 is overbroad to the extent that we can not interpret what you may be asking for. Please limit this portion of your request to an identifiable set or sets of records.

Information redacted from the enclosed records references the location where research animals are housed and research activities are performed (Wis. Stats. §19.85(1)(d)), references campus contact information and references personally-identifiable information pertaining to research staff (Wis. Stats. §19.35(1)(g)). Moreover, the Balancing Test inherent in the Public Records Law leads us to the specific determination that the public interest in preventing harassment of research staff outweighs the negligible public interest in disclosure of this information. The name of research collaborator is withheld per the Balancing Test as we believe that the public interest in preventing harassment of the collaborator outweighs the public interest in disclosure of this information. Finally, application of the Balancing Test leads us to a determination that information about a restricted-access web site should be redacted to prevent unauthorized use of the site. We feel that the potential for such unauthorized use and vandalism of vital clinical

Research Animal Resources Center

records significantly outweighs the public's negligible interest in knowing information that could allow access to this web site.

As we have determined that the information described above should be redacted for the reasons stated, please note that this determination is subject to review under Wis. Stats. §19.37(1) or upon application to the attorney general or a district attorney.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. Lane", with a long horizontal flourish extending to the right.

Richard R. Lane,
Associate Director
